

Project Design Phase

Problem – Solution Fit Template

Date	30 June 2026
Team ID	
Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

"Farmers, researchers, and policymakers often struggle to analyze large volumes of agricultural crop production data because it is scattered across multiple sources and difficult to interpret. Existing methods, such as spreadsheets and reports, are time-consuming and provide limited visual insights. To address this problem, our solution is an interactive Tableau dashboard that enables users to filter, compare, and visualize crop production by state, district, season, and crop. This helps users quickly identify trends, make informed decisions, and improve agricultural planning."

Template:

Problem-Solution fit canvas 2.0

Purpose / Vision: Empower data-driven decisions for better agricultural planning and productivity.

1. CUSTOMER SEGMENT(S) CS Who is your customer? - Government officials & policy makers - Agricultural researchers & analysts - Farmer & Farmer organizations - NGOs & development organizations - Students & academicians - Agri businesses & stakeholders	2. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices of solutions? - Limited access to timely and accurate data - Lack of data analysis skills - Budget limitations for advanced tools - Poor internet connectivity in rural areas - Limited awareness of data-driven tools - Time constraints for data analysis	3. AVAILABLE SOLUTIONS AS Which solutions are available to the customer when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? - Government reports & publications (Pros: official, reliable. Cons: not real-time, hard to analyze) - Excel sheets (Pros: widely used. Cons: time-consuming, error-prone) - Other dashboards & websites (Pros: visual. Cons: limited filters, less customization) - Manual records (Pros: simple. Cons: outdated, not scalable)
2. JOBS-TO-BE-DONE / PROBLEMS JBP Which jobs-to-be-done (or problems) do you address for your customer? There could be more than one, explore different jobs. - Analyze crop production trends over years - Compare production across states, districts, crops & seasons - Identify top producing crops, states & districts - Support data-driven planning & policy making - Monitor agricultural performance & changes over time	3. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the basic story behind the need to do this job? - Data is scattered across multiple sources and formats - Lack of real-time, interactive, consolidated view - Manual analysis is slow and inefficient - Increasing need for quick insights for planning and decision-making - Growing demand for transparency and accountability in agriculture sector	4. BEHAVIOUR BE What does your customer do to address the problem and get the job done? - Search for agricultural data online - Download reports and analyze manually - Use Excel to create charts and summaries - Attend meetings, seminars, discussions - Consult experts or colleagues for insights - Spend time on social media & forums for updates
3. TRIGGERS TR What triggers a customer to act? - New government policies or announcements - Changes in crop production or market trends - Need for seasonal planning and budgeting - Available resources or project requirements - Increasing efficient change requests	10. YOUR SOLUTION YS If you are working on or testing business, write down your current solution. How fit is the solution, and what has brought it to this reality? If you are working on a new business proposition, then keep it blank until you fit in the canvas and come up with a solution that fits within customer constraints, solves a problem and matches customer behaviour. Our Solution: An interactive Tableau Dashboard for Agricultural Crop Production (1997-2021) that provides: - Real-time filtering by State, District, Crop, Season, Year - Visualizing Production, Price, Yield, Trends - Comparative analysis across regions and time - Easy-to-use interface for all user types - Export and sharing of insights and reports	6. CHANNELS OF BEHAVIOUR CB 6.1 ONLINE - Government websites, data portals - Search engines, research papers - Social media, forums, online communities - Email newsletters, advice reports 6.2 OFFLINE - Meetings, workshops, seminars - Physical reports, journals, documents - Field visits, surveys, discussions - Agriculture fairs, exhibitions
