Project Name	India's Agricultural Crop Production Analysis
Maximum Marks	4 Marks

Empathy Map Canvas:

Farmers, researchers, and policymakers need a simple way to analyze agricultural crop production data. They aim to compare crops, states, districts, and seasons to identify trends and improve planning. However, large and scattered datasets make analysis difficult and time-consuming. This often leads to confusion and delays in decision-making. An interactive Tableau dashboard provides clear visual insights, enabling faster analysis, better comparisons, and informed agricultural decisions."
